Subject: Water Year 2007 Administration of Central Utah Project, Bonneville Unit, Utah Lake / Provo River Storage Exchanges under CUP Water Right Nos. A40523, A36639, A37093, E398, E4319 and Central Utah Water Conservancy District Water Right Nos. E3100 and E3101

Dear John:

In late January 2007 the elevation of Utah Lake reached 4489.045, compromise elevation, and the radial gates to the Jordan River were opened. On this date approximately 33,787 acre-feet of CUP Strawberry import water was being stored in Utah Lake on a space available basis subject to incremental evaporation. The following table accounts for Strawberry imports to Utah Lake and incremental evaporation on a monthly basis.

CUP Import Water Delivery from Strawberry Reservoir to Utah Lake						
	Strawberry Res.	Strawberry Res.	35 Percent		Total	Total
	Direct	CUP Ag.	CUP Ag.	Less	CUP Direct and	UP Utah Lake

As the space available in Utah Lake decreased CUP import water spilled out through the Jordan River. At this time all CUP water has spilled from the lake. Utah Lake has already crossed the conversion line this year. We request that you convert all system storage in Deer Creek and Jordanelle reservoirs to priority storage.

Please contact me if you have any questions.

Sincerely yours,
